Error Log

Copy this table after every practice set. An error log is more valuable than re-reading notes you already know.

Date	Section	Question/ pattern	Wrong/ guessed/slow	Root cause	Correct rule	Linked note	Re-test date	Fixed?

Root-cause choices

- Formula not known
- Concept confused
- Misread wording
- Arithmetic slip
- Poor time decision
- Pseudocode update order
- Loop/condition error
- Coding edge case
- Coding syntax/input-output
- Panic/attention lapse

The repair rule

For each row:

1. Write one sentence explaining the correct rule.
2. Link the specific note.
3. Re-solve an equivalent question after two hours.
4. Re-solve it once more the next day.
