

CoCubes / Aon Assessment: 2–3 Day High-Score Vault

This is a self-contained Obsidian vault for the assessment syllabus you shared:

Module	Questions	Time
Aptitude	30	30 minutes
Technical	30	30 minutes
Pseudocode	20	20 minutes
Coding	2	30 minutes
Gamified assessment	Variable	about 35 minutes

Open this entire folder as a vault in Obsidian. Start at `[[00_Start_Here/Dashboard|Dashboard]]`.

The material is designed for score maximisation in two or three focused days. It is deliberately high-yield: learn the essentials, practise under time pressure, log every error, then revise only weak areas.

The PYQ section is a research synthesis from public, candidate-reported and sample sources. It does not reproduce proprietary question banks. Instead, it identifies recurring topics and provides original questions that practise the same skill.
